

ERRATA

- The most important error in this book is the absence of page numbers. I have to blame this on computer glitches. My suggestion is to number the pages by hand. The Table of Contents will give you starting points. Number the first page of each section; fill in after. I tried it and it works if you just draw lines through "1879 'From History of Solano County,' '1954 Centennial' and '1979 125 Years.'" These headings do not appear in print.
- There are several typographical errors consistent with books of this nature. My suggestion is to just deal with it.
- In "Signatures on the By-laws" (page 23) John Lucas (signature 1068) was successor to Loren A. Wann.
- The picture of Benjamin Rush (page 174) is not reproducible.
- The following picture belongs on the 1904 master's page of William C. Sheldon. My suggestion is that you cut and paste the picture in the space provided.

I apologize for these inconveniences but there is nothing else I can do about it.

Warren C. Sheldon
